

Bits & Bytes Laptop Group

February 2012

This month's Laptop session follows up on the recent Google workshop.

We will get everyone signed up for a Gmail account and get all your mail directed to one mail service.

Don't forget one big Gmail bonus is being able to call any phone in North America for **FREE**.

To assist us in working with Gmail, makeuseof (<http://www.makeuseof.com/pages/download>) is allowing us to download "The Ultimate Guide to Gmail" by using the following link:

https://www.sugarsync.com/pf/D6415282_1896302_714567

The Ultimate Guide To Gmail

Downloading the pdf guide is optional, but will provide a complete reference to Gmail.

In addition, a free instructional video on fourteen different aspects of "How to Use Gmail" is available at:

http://www.ehow.com/videos-on_5885_use-gmail.html

Both these references will help when you have a problem with Gmail.
