

Bits & Bytes Laptop Group

April 2012

In April's Laptop session we will look at software to make computing easier. In addition to any topics that come up, we will examine some of the following:

1. Two free tools to analyze an Email Header to show the route taken:

Suggestion 1:

http://www.levinecentral.com/mail_parse/default.aspx

2. Suggestion 2:

<http://www.gaijin.at/en/olsmailheader.php>

3. Fix USB Problems and Issues in Windows 7 with Windows USB Troubleshooter:
