

Notes for SCRATCH presentation, May 20, 2014.

As promised, here are some relevant links. Please forward those that you think the members will find interesting.

Main site:

<http://scratch.mit.edu>

From there you can start by either registering or going to the help page

<http://scratch.mit.edu/help/>

Most people prefer to work on the browser but if anyone wants to install the off-line editor, here is the link and instructions

<http://scratch.mit.edu/scratch2download/>

Here is the project we did on the second half "First Duck". Remind them that they can "Remix" and modify it.

<http://scratch.mit.edu/projects/22537464/#editor>

Here are some projects Sergiane did as part of other training sessions
halloween game - witch catching apples game

<http://scratch.mit.edu/projects/13268510/>

Scratch demonstration - one sprite sleeping, the other walking

<http://scratch.mit.edu/projects/17057342/>

And this project that uses trigonometry
