

Paint.Net and Flickr for your Digital Photos

Paint.Net – a free photo editing program. It can be downloaded for free by following the link on the Photo Editing page of the Bits & Bytes Club website:

<http://www.bitsbytes.ca/photoedit.htm>

Some of the things that can be done:

- Adjust the brightness of an under/overexposed picture
- Repair scratches and blemishes
- Fix red eye
- Add text to a picture
- Create composite pictures
- Resize pictures
- Crop parts of pictures
- Change pictures from one format to another

Flickr – an online picture storage / sharing site available at:

<http://www.flickr.com>

- Allows you to store up to 50 pictures for free.
- Unlimited pictures for a yearly fee (currently, \$24.95 US)
- Great for keeping backup copies of your pictures
- Allows you to share pictures with family and friends

Picture sharing can be made:

- Private (only you will be able to see the pictures)
- Shared with friends and family (You limit who has access)
- Public – anyone can see your pictures.

Pictures can be viewed:

- As a slideshow
- Individually (you upload the originals and Flickr will create different sizes to be viewed or downloaded.)
