

Notes – Portable Computing Group, Wed., Dec 11, 2013

Some members obtained a copy of the Knoppix Live DVD at Bob Jonkman's Speaker's Meeting presentation on Oct 16, 2013. If you did not get a copy, then these notes will help you get your copy.

- Go to <http://www.knopper.net/knoppix/index-en.html>
- Left click on the Penguin icon labelled "Download"
- Using a USA site like mirrors.kernel.org (2nd line), left click on [http DVD]
- Accept the download agreement
- Find the ISO file for the latest version in English (KNOPPIX_V7.2.0DVD-2013-06-16-EN.iso)
- Left click and then be patient (do NOT do the download at DCC)

Once downloaded, the ISO file must be burned to a DVD using software like IMGBURN (<http://www.imgburn.com/>).

(Please refer to last month's PCG meeting concerning the care needed when installing free software.)

What is Knoppix, and why use it – see <http://en.wikipedia.org/wiki/Knoppix>
