

# Replacing my Rogers Cable Internet Service

The CarryTel Story – Too Good To Be  
True?

- In late August I decided it was time to save more money on my Rogers bill (remember my switch to Ooma 1 year ago?)
- Based on some discussions with friends I started by looking into TekSavvy
- <https://teksavvy.com/en/residential/internet/cable>

This page useful for the PowerPoint presentation only – otherwise, please skip to the next page

- Checked with Bob
- Discovered an additional reason to change
- Then I got annoyed with TekSavvy!
- Elmer makes a suggestion
- Plan cost on the CarryTel website
- The order, etc
- My CarryTel invoices

(CarryTel website)

<http://www.carrytel.ca/rfd-special.aspx>

(promotions that may still be available)

- Transfer scheduled for 8am to 11am, Oct 3rd (I expected a remote install transfer)
- I disconnected the Rogers Gateway at 8am and started up the TC4350
- Rogers Tech (Ramkey) showed up at 10:20am
- Tech looked at my install and left by 10:25am
- Connected and Internet working at 10:29am
- Speed tests consistently 75 Mb/s down and 10 Mb/s up. No outages yet.
