

How do I set up my Green P wallet for the first time?

When using the Green P App/Green P Mobile Pay for the first time, you must create a parking session in order to load funds into your Green P Account. To start your first parking session and load your digital wallet follow these steps:

- 1. To add a payment method to your account, begin a new session**
- 2. Enter the Location ID from one of our Green P Mobile Pay Signs**
- 2. Select an existing or add a new vehicle**
- 3. Choose the length of time you'd like to park for**
- 4. Click Continue**
- 5. Then click a Funding Source**
- 6. Select whether you would like to pay using Apple Pay, Google Pay, Credit Card, or PayPal**
- 7. Then, enter your payment information, hit save**
- 8. Your payment method is now set up and ready to go**

When you initiate or extend a parking transaction the balance in the Green P digital wallet will be checked. If the balance is insufficient for a parking session or when your account balance reaches \$0, your account will auto recharge.
