

## Windows 10 Discussion Before Upgrading

- 1 Make sure you have a Microsoft Account and Passwords  
<https://www.microsoft.com/en-us/account>  
Click Create a Free Microsoft Account
- 2 Make a list of all your passwords  
Log in Names and Passwords (Facebook Google Email Apps.)
- 3 Make sure that any Application that is important to you is compatible with Windows 10.
- 4 If you are upgrading a laptop or tablet have them plugged in to power.
- 5 If possible connect them to directly to your router.  
(this gives you better download speed) 100 versus 54 megabits
- 6 House Cleaning (for Programs that are on your computer)
  - a Cleaning Browser History
  - b E-mail deleted file
  - c Empty your Recycle Bin
- 7 Backup anything that is important to you Photos, Documents  
Contacts E-mail if not an web based email and Favorites  
(recommend using USB thumb drive or USB external drive)
